## JetMag Pro 100mm Holder Installation Instructions

1. Before attaching the holder, firstly install the JetMag Pro filter onto the JetMag Adapter ring and lock it before you use the filter holder.
2. Lock the holder by turning the silver screw.

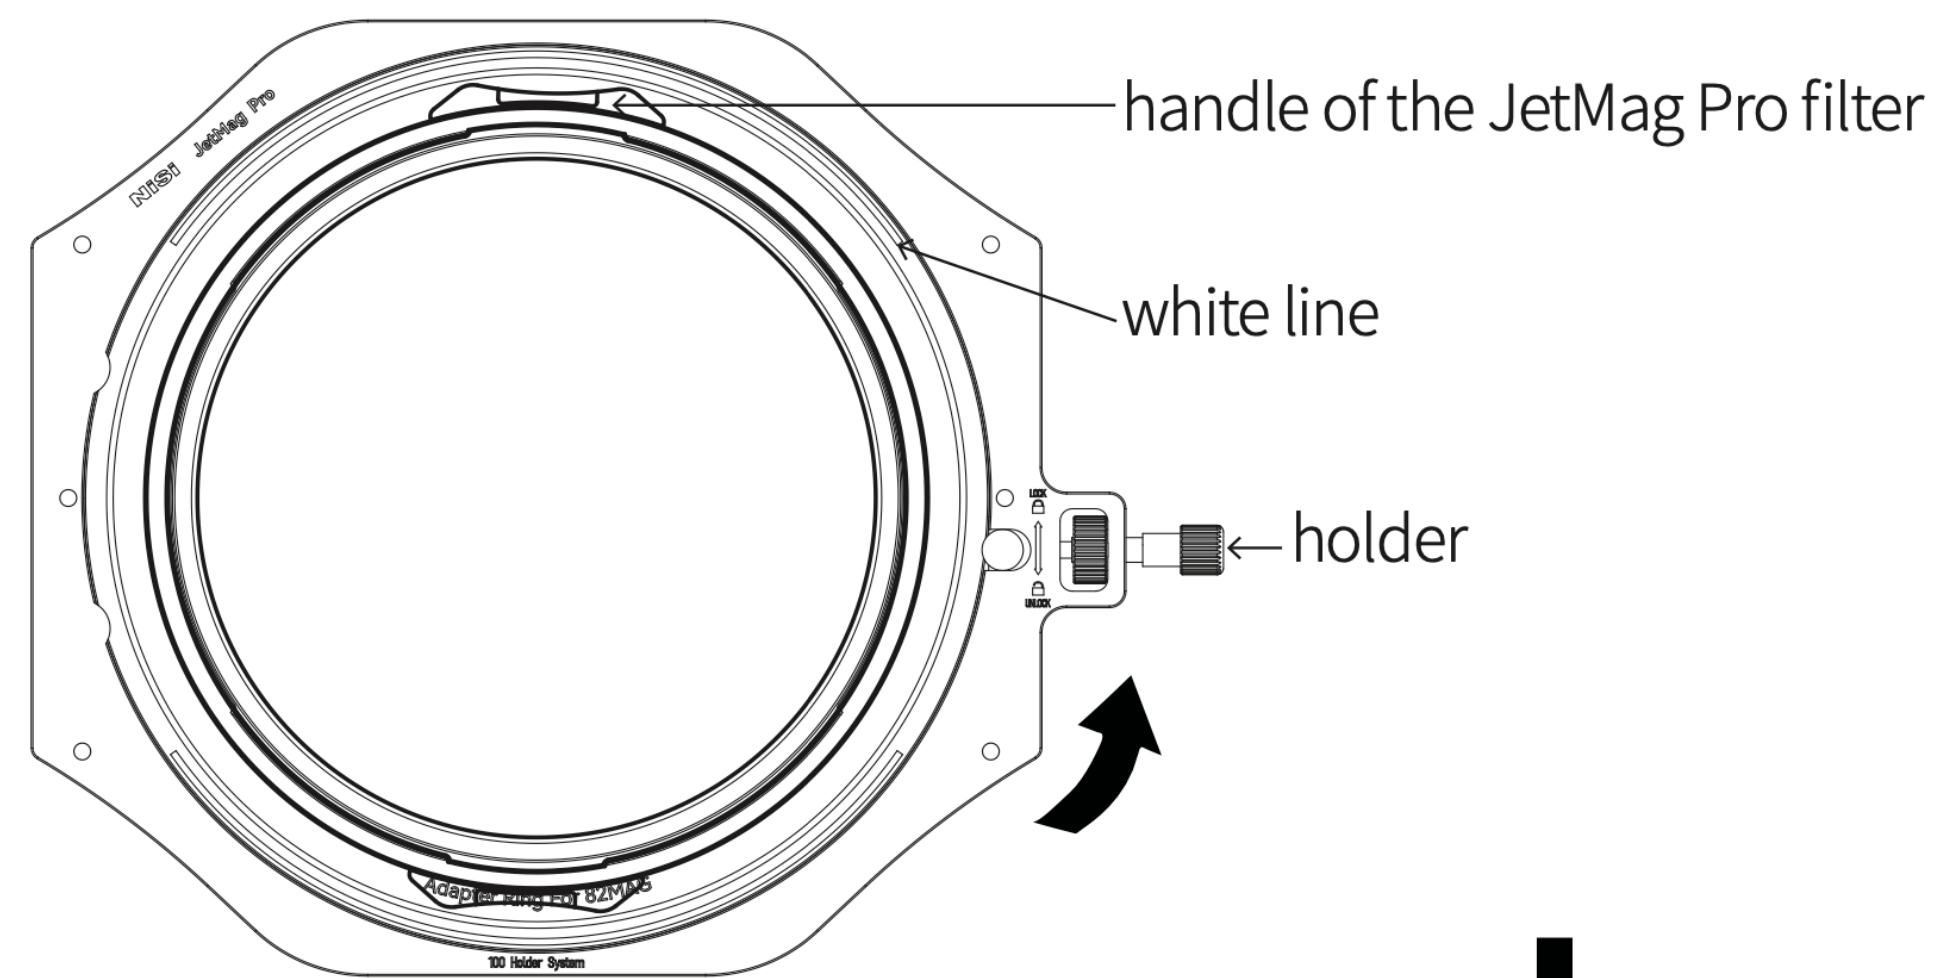

3. Align the side of the 82MM holder adapter with the white line facing the camera. Align with the section of the holder adapter that does not have white markings (magnetic connection point).

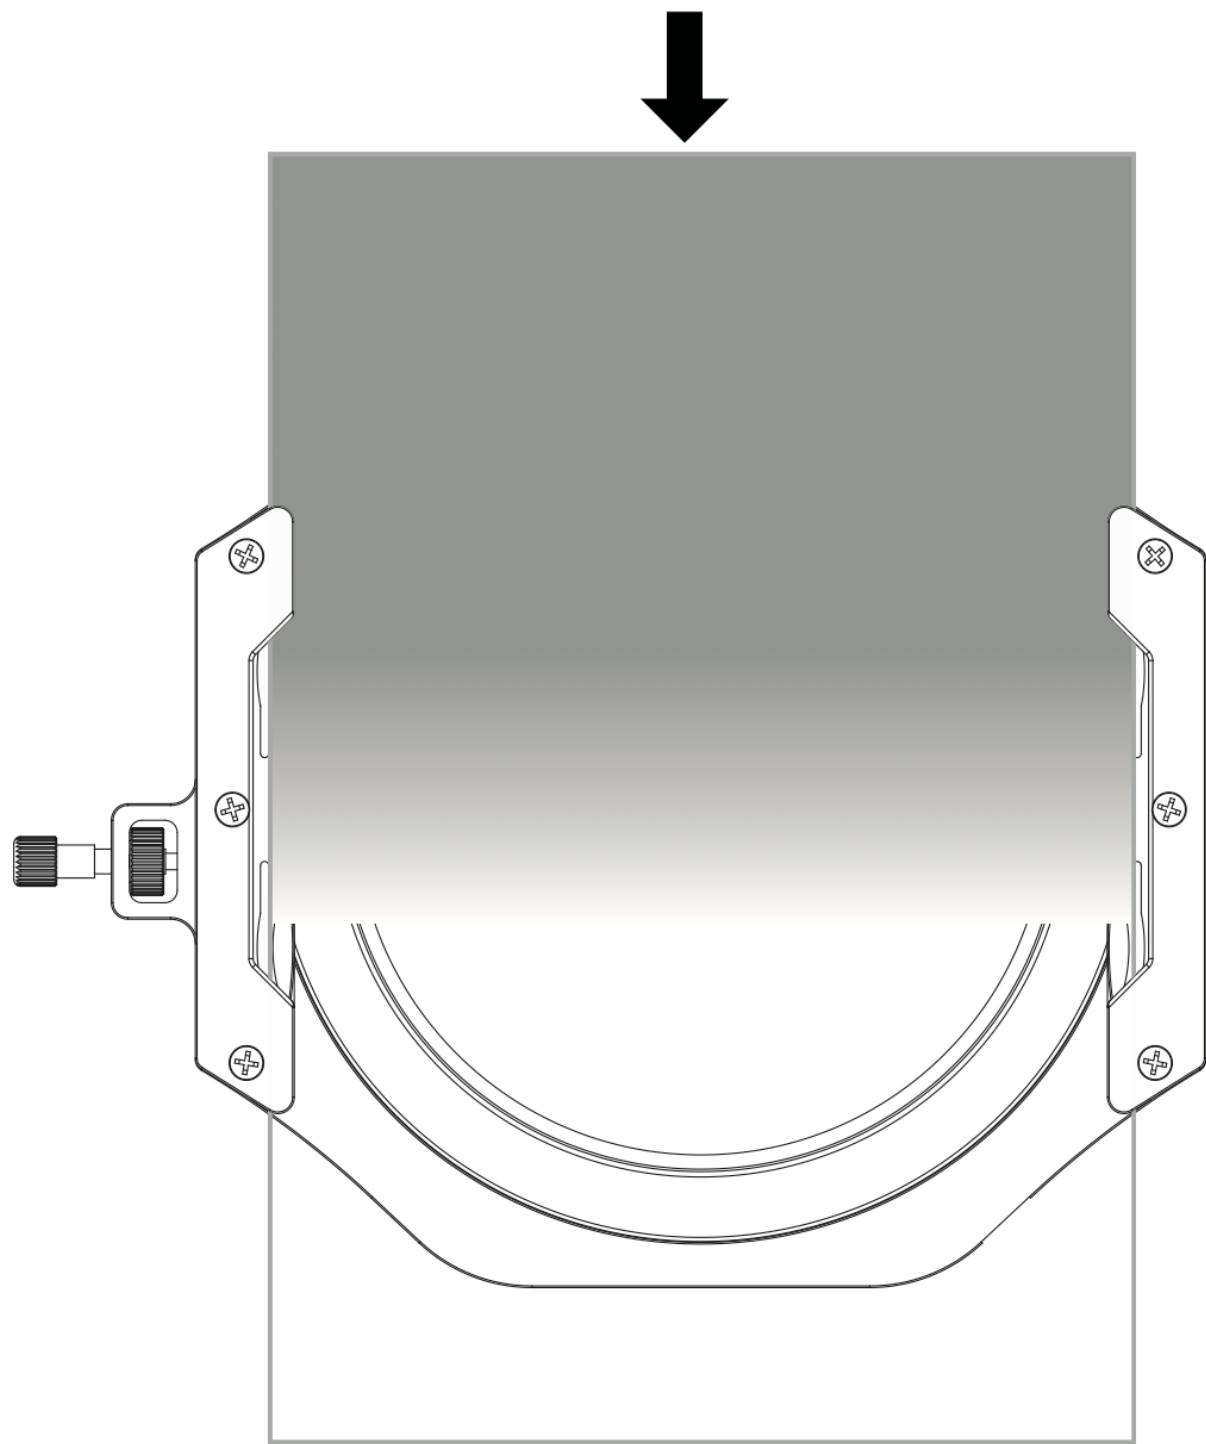

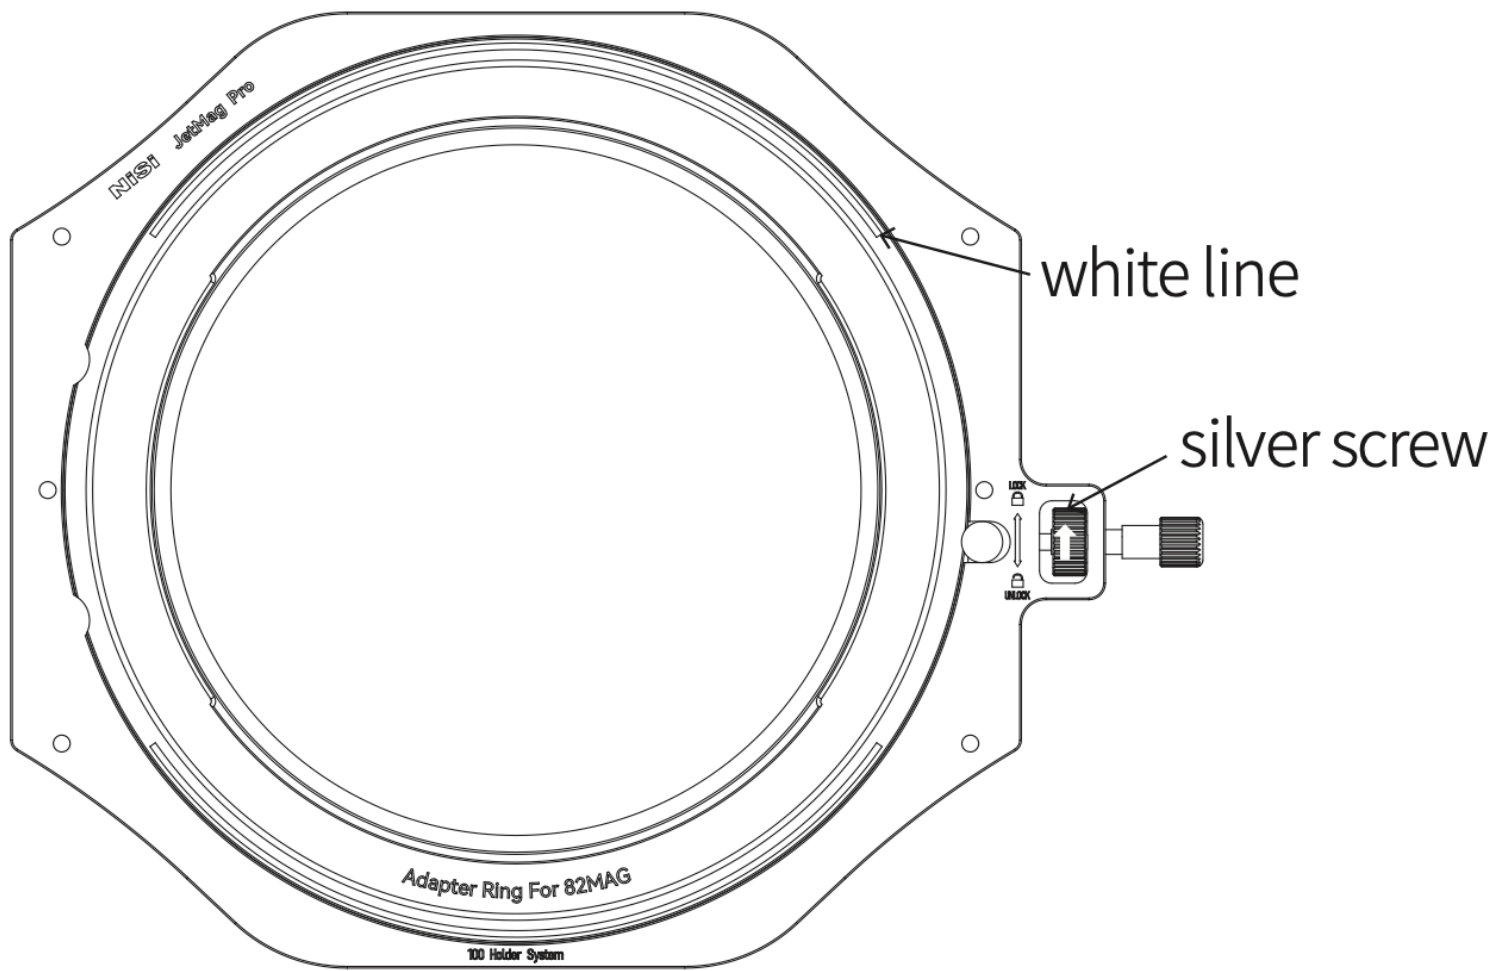

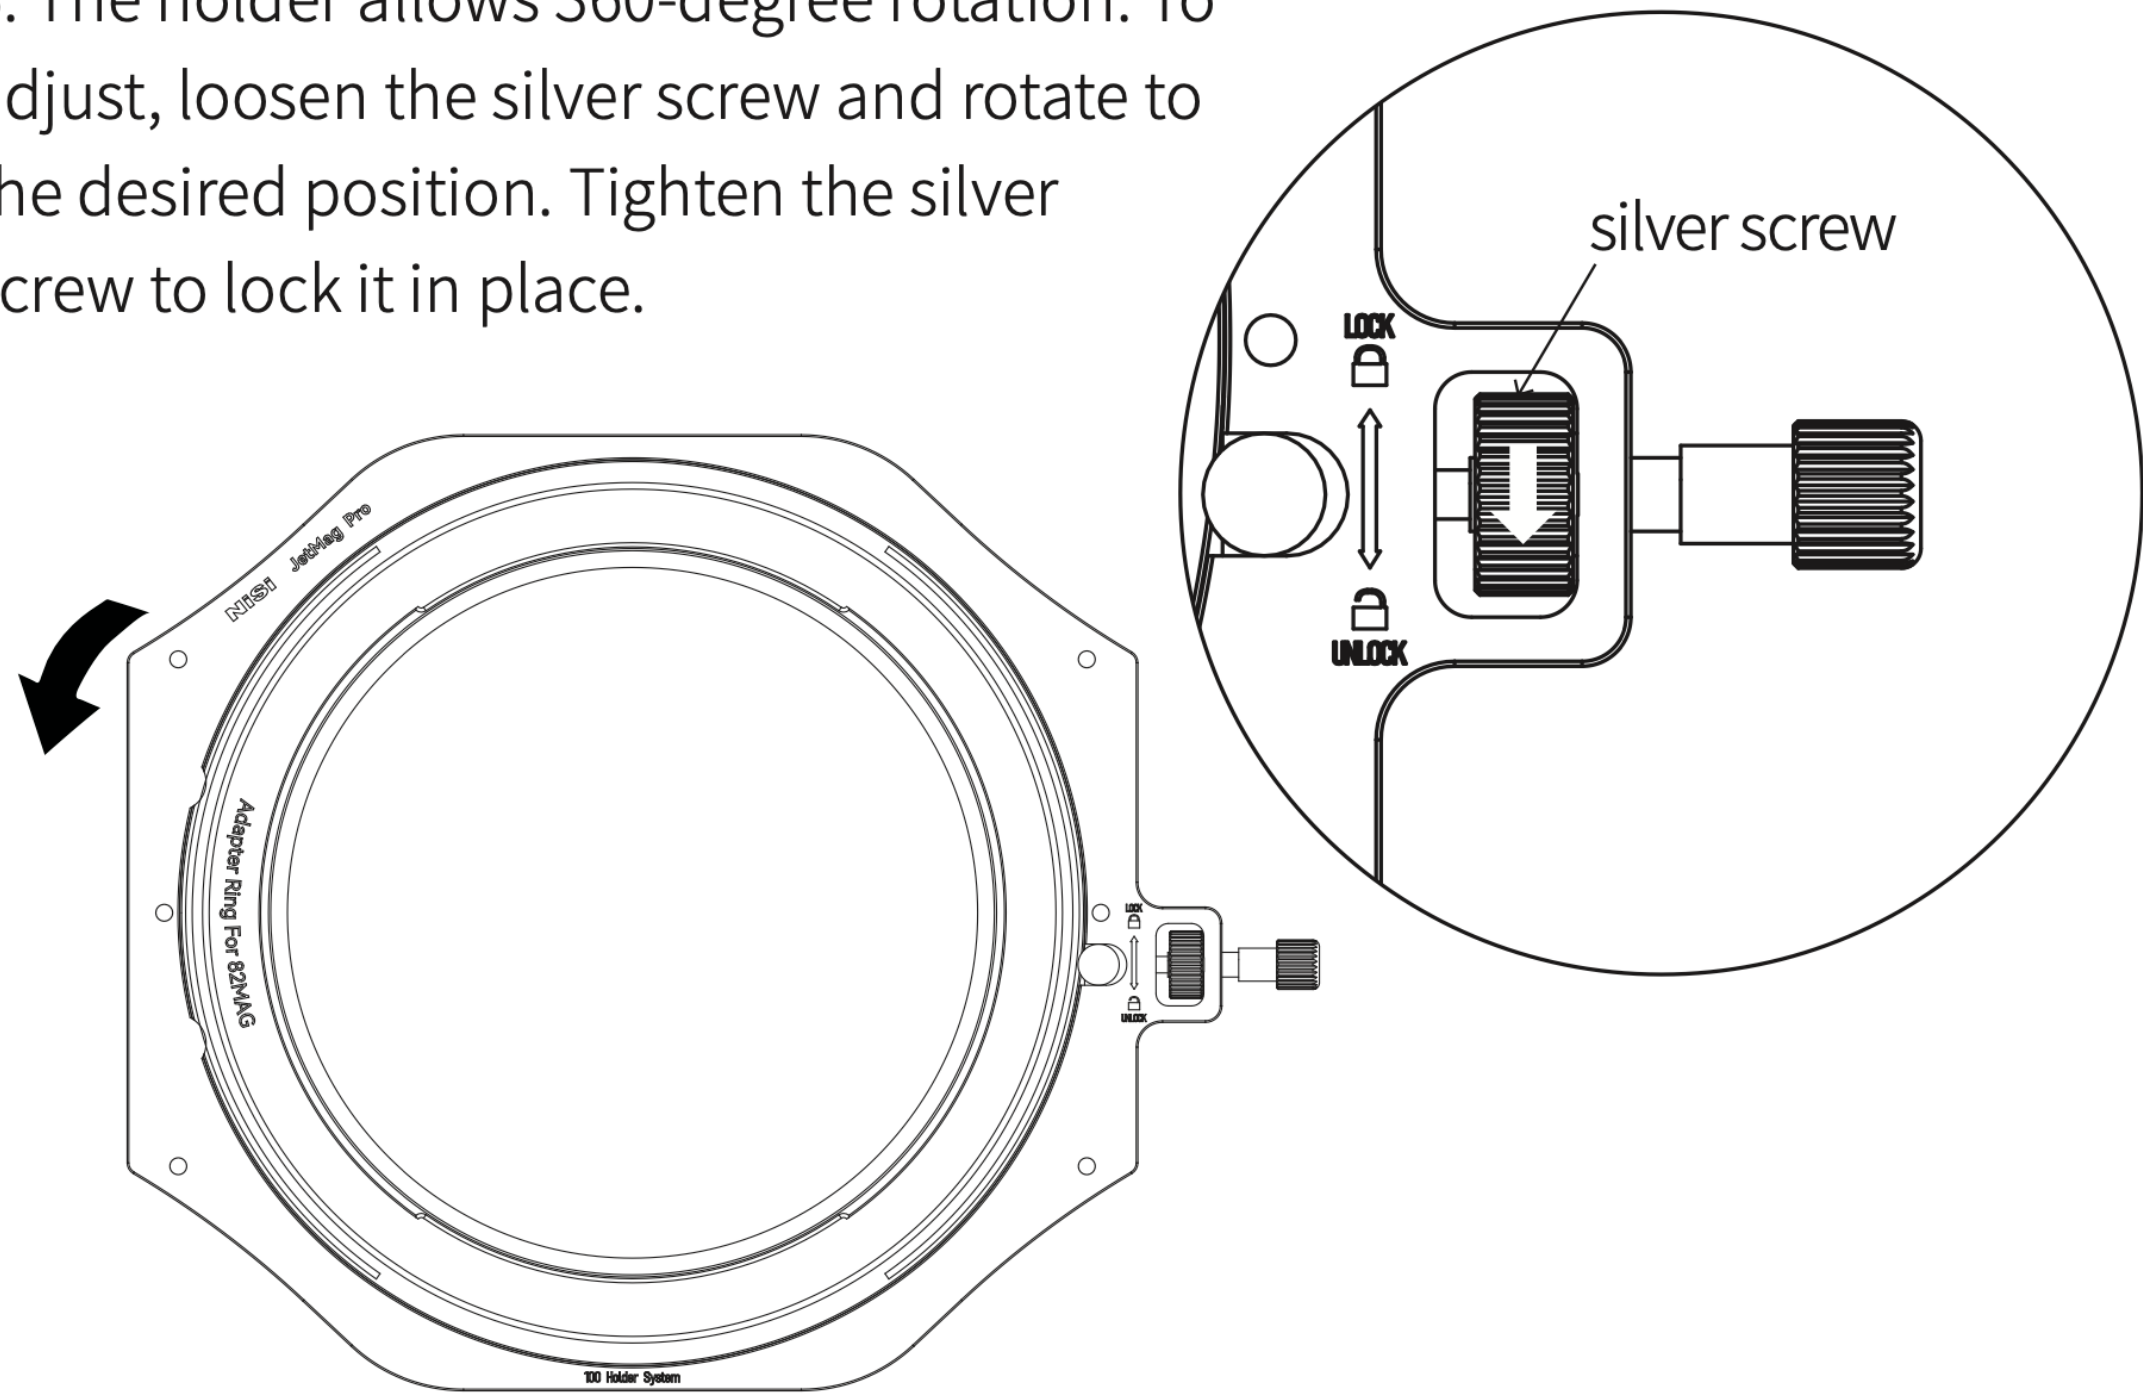

4. Rotate the holder until the JetMag Pro filter handle aligns with the white line. This will lock the main adapter in place.

5. Insert square filters—compatible with all standard 100mm system filters.

6. The holder allows 360-degree rotation. To adjust, loosen the silver screw and rotate to the desired position. Tighten the silver screw to lock it in place.

7. To remove the filter holder, tighten the silver screw and rotate it to the section without a white line.
